General Certificate of Secondary Education

Mark Scheme for June 2023

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2023

MARKING INSTRUCTIONS

PREPARATION FOR MARKING

RM ASSESSOR

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: *RM Assessor Online Training*; *OCR Essential Guide to Marking*.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are available in RM Assessor.
3. Log-in to RM Assessor and mark the **required number** of practice responses (“scripts”) and the **required number** of standardisation responses.

MARKING

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the RM Assessor 50% and 100% (traditional 50% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone, email or via the RM Assessor messaging system.

5. Work crossed out:
- where a candidate crosses out an answer and provides an alternative response, the crossed-out response is not marked and gains no marks
 - if a candidate crosses out an answer to a whole question and makes no second attempt, and if the inclusion of the answer does not cause a rubric infringement, the assessor should attempt to mark the crossed-out answer and award marks appropriately.
6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there, then add the annotation SEEN to confirm that the work has been read.
7. There is a NR (No Response) option. Award NR (No Response)
- if there is nothing written at all in the answer space
 - OR if there is a comment which does not in any way relate to the question (e.g. 'can't do', 'don't know')
 - OR if there is a mark (e.g. a dash, a question mark) which isn't an attempt at the question.

Note: Award 0 marks – for an attempt that earns no credit (including copying out the question).

8. The RM Assessor **comments box** is used by your Team Leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.**
- If you have any questions or comments for your Team Leader, use the phone, the RM Assessor messaging system, or email.
9. Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.

10. For answers marked by levels of response:

Read through the whole answer from start to finish, using the Level descriptors to help you decide whether it is a strong or weak answer. The indicative scientific content in the Guidance column indicates the expected parameters for candidates' answers, but be prepared to recognise and credit unexpected approaches where they show relevance. Using a 'best-fit' approach based on the skills and science content evidenced within the answer, first decide which set of level descriptors, Level 1, Level 2 or Level 3, best describes the overall quality of the answer.

Once the level is located, award the higher or lower mark:

The higher mark should be awarded where the level descriptor has been evidenced and all aspects of the communication statement (in italics) have been met.

The lower mark should be awarded where the level descriptor has been evidenced but aspects of the communication statement (in italics) are missing.

In summary:

The skills and science content determines the level.

The communication statement determines the mark within a level.

Level of response questions on this paper is **16**.

11. Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

12. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

13. Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

The breakdown of Assessment Objectives for GCSE (9-1) in Combined Science A:

	Assessment Objective
AO1	Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.
AO1.1	Demonstrate knowledge and understanding of scientific ideas.
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.
AO2	Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.
AO2.1	Apply knowledge and understanding of scientific ideas.
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.
AO3	Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.
AO3.1	Analyse information and ideas to interpret and evaluate.
AO3.1a	Analyse information and ideas to interpret.
AO3.1b	Analyse information and ideas to evaluate.
AO3.2	Analyse information and ideas to make judgements and draw conclusions.
AO3.2a	Analyse information and ideas to make judgements.
AO3.2b	Analyse information and ideas to draw conclusions.
AO3.3	Analyse information and ideas to develop and improve experimental procedures.
AO3.3a	Analyse information and ideas to develop experimental procedures.
AO3.3b	Analyse information and ideas to improve experimental procedures.

For answers to Section A if an answer box is blank ALLOW correct indication of answer e.g., circled or underlined.

Question	Answer	Marks	AO element	Guidance
1	C	1	1.1	
2	A	1	1.2	
3	A	1	1.2	
4	A	1	2.1	
5	C	1	1.1	
6	D	1	2.1	
7	B	1	2.1	
8	B	1	1.1	
9	C	1	2.1	
10	B	1	2.1	

Question		Answer	Marks	AO element	Guidance
11	(a)	They have been irradiated only ✓	1	2.1	ALLOW any indication of the first box selected e.g., X or circling but ticking takes precedence DO NOT ALLOW more than one box ticked
	(b)	They have been irradiated and contaminated ✓	1	2.1	ALLOW any indication of the third box selected e.g., X or circling but ticking takes precedence DO NOT ALLOW more than one box ticked
	(c)	They have not been irradiated or contaminated ✓	1	2.1	ALLOW any indication of the fourth box selected e.g., X or circling but ticking takes precedence DO NOT ALLOW more than one box ticked

Question		Answer	Marks	AO element	Guidance
12	(a)	Gamma rays ✓	1	2.2	ALLOW gamma / symbol γ
	(b)	Gamma rays ✓	1	1.1	ALLOW gamma / symbol γ
	(c)	10^2 ✓	1	2.2	ALLOW any indication of the correct answer selected e.g., ticking or underlining but circling takes precedence DO NOT ALLOW more than one answer circled
	(d)	First check the answer on answer line If answer = 1 000 000 (Hz) award 2 marks (Frequency =) 10^6 (Hz) ✓ (Frequency =) 1 000 000 (Hz) ✓	2	1.2 2.2	ALLOW answer on graph ALLOW 1×10^6 (Hz) for 1 mark ALLOW ECF from standard form to non-standard form e.g., 10^7 to 10 000 000 (Hz) for 1 mark
	(e)	They are transverse waves ✓	1	1.1	ALLOW any indication of the fourth box selected e.g., X or circling but ticking takes precedence DO NOT ALLOW more than one box ticked

	(f)	<p>First check the answer on answer line If answer = 0.7 (h) award 3 marks</p> <p>(Time =) $\frac{\text{energy transferred}}{\text{power}}$ ✓</p> <p>(Time =) $\frac{0.56}{0.8}$ ✓</p> <p>(Time =) 0.7 (h) ✓</p>	3	<p>1.2</p> <p>2 × 2.1</p>	<p>ALLOW POT error e.g., 7 / 70 / 0.07 on answer line = 2 marks</p> <p>ALLOW symbols (t =) $\frac{W}{P}$ or $\frac{E}{P}$</p> <p>ALLOW for 1 mark the numbers in an unrearranged equation e.g.: 0.56 = 0.8 × t</p>
--	-----	---	---	---------------------------	--

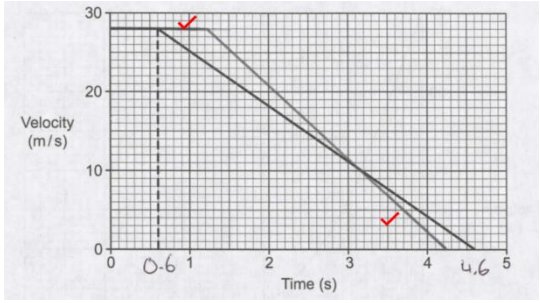

Question		Answer	Marks	AO element	Guidance
13	(a)	<p>Any two from:</p> <p>(Demand) increases at/from 14:00 ✓</p> <p>(Demand) peaks during range 17:00 to 20:00 ✓</p> <p>(Demand) dips (slightly) during the peak / increases and then decreases (during the peak) ✓</p> <p>(Demand) decreases at/from 19:00 to 20:00 ✓</p> <p>(Demand) decreasing at 23:00 / less at 23:00 than 14:00 ✓</p>	2	2 x 3.1a	<p>ALLOW times using non 24-hour clock e.g., 2(pm) and 11(pm)</p> <p>IGNORE reasons and explanations for changes</p> <p>ALLOW peak at any time in this range e.g., peaks at 18:00 / up until 18:00 / to 18:00</p> <p>ALLOW decrease at/from any time in this range e.g., decreases at 19:30</p> <p>ALLOW demand at 14:00 is high and demand at 23:00 is low</p> <p>Alternative method using MW:</p> <p>increases at/from 27 500 or 27 800 (MW)</p> <p>peaks during range 32 000 to 33 000 (MW)</p> <p>dips (slightly) during the peak / increases and then decreases</p> <p>decreases at/from 32 500 to 33 000 (MW)</p> <p>decreasing at 23:00 / less at 23:00 than 14:00 / at 23:00 is 22 000 to 23 000 (MW)</p> <p>ALLOW mixture of time and MW but must be different marking points</p>

	(b)	<p>Any two from:</p> <p>Gas fired power stations are quick to start up ✓</p> <p>(Rapid) increase in demand / extra energy/power needs to be generated ✓</p> <p>(Because) people are waking up / people need to make breakfast / people are using (electrical) devices ✓</p>	2	2 × 3.2a	<p>ALLOW needs to be a power station that is quicker (to start)</p> <p>ALLOW make sure enough power is available / to meet the demand / know demand is going to increase</p> <p>IGNORE references to incorrect times and just ALLOW for the action that increases the demand e.g., people use showers / cook food / switch TV on for 1 mark</p>
--	-----	--	---	----------	---

	(c)	(i)	<p>First check the answer on answer line If answer = 62.5 (%) award 3 marks</p> <p>(Peak =) 32 800 OR (Baseload =) 20 500 ✓</p> <p>$\frac{20\,500}{32\,800} \times 100$ ✓ 62.5 (%) ✓</p>	3	<p>2.2</p> <p>2 × 1.2</p>	<p>ALLOW (peak =) in the range 32 700 to 32 900 (baseload =) in the range 20 400 to 20 600</p> <p>ALLOW answer in the inclusive range 0.62 to 0.63 for 2 marks</p> <p>ALLOW answer in the inclusive range 62 to 63 for 3 marks</p> <p>ALLOW ECF for correct substitution e.g.:</p> <p>baseload 20250 peak 32800 (1 mark)</p> <p>$\frac{20\,250}{32\,800} \times 100$ (1 mark)</p>
		(ii)	<p>Fossil fuel / nuclear ✓</p>	1	1.1	<p>ALLOW gas / diesel / coal / oil</p> <p>IGNORE electric</p> <p>DO NOT ALLOW any renewable resources</p>

Question		Answer	Marks	AO element	Guidance
14	(a)	<p>First check the answer on answer line If answer = 33 000 (V) award 2 marks</p> <p>4500 × 132 000 = 18 000 × p.d. OR (p.d. =) $\frac{4500 \times 132\,000}{18\,000}$ ✓</p> <p>(p.d. =) 33 000 (V) ✓</p>	2	2 × 2.1	
	(b)	<p>Any one from:</p> <p>98% of the energy output is useful ✓</p> <p>98% of the energy input is usefully transferred ✓</p> <p>2% of the energy output is wasted or dissipated ✓</p>	1	1.1	<p>ALLOW power for energy throughout question</p> <p>ALLOW 98% of the energy is used IGNORE only works 98% of the time</p> <p>ALLOW 2% of energy (output) is 'lost' (to the surroundings) / 98% of energy is not 'lost' (to the surroundings)</p>

Question			Answer	Marks	AO element	Guidance
15	(a)	(i)	2.48 (m/s ²)	1	2.2	ALLOW answer in the inclusive range 2.46 to 2.5(0)
		(ii)	<p>First check the answer on answer line If answer = 3.0 (m/s²) award 2 marks</p> <p>Attempt at extrapolation of graph ✓</p> <p>3.0 (m/s²) ✓</p>	2	2 × 2.2	<p>IGNORE equation of motion use</p> <p>ALLOW any line from 800 back towards the y-axis</p> <p>ALLOW 3 (m/s²) ALLOW answer in the inclusive range 2.9 to 3.1 for 2 marks</p>
	(b)		Travelling along a motorway ✓	1	2.1	<p>ALLOW any indication of the second box selected e.g., X or circling but ticking takes precedence</p> <p>DO NOT ALLOW more than one box ticked</p>

	(c)	<p>(i) Any one from:</p> <p>Velocity/speed of driver unchanged/constant ✓</p> <p>Decelerates/brakes after/at 0.6 s ✓</p>	1	3.2b	<p>ALLOW graph/line is flat/horizontal IGNORE graph/line is straight</p> <p>ALLOW velocity reduces after/at 0.6 s</p> <p>DO NOT ALLOW thinking distance is 0.6 s / decelerates for 0.6 s / brakes for 0.6 s</p>
		<p>(ii) First check the answer on answer line If answer = 56 (m) award 2 marks</p> <p>Attempt to calculate area under graph / $\frac{1}{2} \times 4 \times 28$ ✓</p> <p>(distance =) 56 (m) ✓</p>	2	2 × 1.2	<p>ALLOW $\frac{1}{2} \times 4.6 \times 28$ or 64.4 for 1 mark</p>
		<p>(iii) Horizontal line at 28 m/s continuing for a time greater than 0.6 s ✓</p> <p>Diagonal line drawn steeper than original line ✓</p>	2	2 × 1.2	<p>Mark independently</p> <p>ALLOW curved diagonal line drawn overall steeper than original</p> <p>looking for:</p> 

Question		Answer	Marks	AO element	Guidance
16	*	<p>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</p> <p>Level 3 (5–6 marks) Detailed explanation of half-life supported with an accurate representation on the graph AND Detailed description of an experiment to measure half-life</p> <p><i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i></p> <p>Level 2 (3–4 marks) Clear explanation of half-life with half-life represented on the graph OR Clear explanation of half-life with a clear description of an experiment to measure half-life</p> <p><i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i></p> <p>Level 1 (1–2 marks) Basic explanation of half-life or basic representation on the graph OR Basic description of an experiment to measure half-life</p> <p><i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i></p>	6	2 × 1.1 2 × 1.2 2 × 2.2	<p>AO1.1 - Demonstrates knowledge and understanding of half-life and how it is represented on a graph</p> <ul style="list-style-type: none"> time taken for activity (of isotope) to halve time taken for mass (of isotope) to halve time taken for number of (undecayed) nuclei to halve time taken for a fixed proportion of the nuclei to decay is constant half-life is constant <p>ALLOW time taken to halve at Level 1 only DO NOT ALLOW time for a nuclei / an atom / a nucleus to halve</p> <p>AO1.2 / 2.2 – Demonstrates and applies knowledge and understanding of scientific techniques to measure half-life</p> <ul style="list-style-type: none"> measure the activity with no isotope present / measure background radiation measure number of counts measure number of counts in a fixed time / measure the time it takes for activity to halve use a Geiger(-muller) tube / use a Geiger counter / use a becquerel counter use a radiation detector at a fixed distance from the isotope repeat the measurements for a period of time draw on the graph to show how the half-life can be represented by the time taken for the activity to halve

			0 marks <i>No response or no response worthy of credit.</i>

CAMBRIDGE
UNIVERSITY PRESS & ASSESSMENT

OCR is part of Cambridge University Press & Assessment, a department of the University of Cambridge.

For staff training purposes and as part of our quality assurance programme your call may be recorded or monitored. © OCR 2023 Oxford Cambridge and RSA Examinations is a Company Limited by Guarantee. Registered in England. Registered office The Triangle Building, Shaftesbury Road, Cambridge, CB2 8EA.

Registered company number 3484466. OCR is an exempt charity.

OCR operates academic and vocational qualifications regulated by Ofqual, Qualifications Wales and CCEA as listed in their qualifications registers including A Levels, GCSEs, Cambridge Technicals and Cambridge Nationals.

OCR provides resources to help you deliver our qualifications. These resources do not represent any particular teaching method we expect you to use. We update our resources regularly and aim to make sure content is accurate but please check the OCR website so that you have the most up-to-date version. OCR cannot be held responsible for any errors or omissions in these resources.

Though we make every effort to check our resources, there may be contradictions between published support and the specification, so it is important that you always use information in the latest specification. We indicate any specification changes within the document itself, change the version number and provide a summary of the changes. If you do notice a discrepancy between the specification and a resource, please [contact us](#).

Whether you already offer OCR qualifications, are new to OCR or are thinking about switching, you can request more information using our [Expression of Interest form](#).

Please [get in touch](#) if you want to discuss the accessibility of resources we offer to support you in delivering our qualifications.
